

Figure 1: A 24x4 grid representing a 24-hour day across four rows. The top row is a timeline with letters D, E, G, A, C, D, E, G, A, C. A red dashed line runs across the top. The grid contains colored circles (black, orange, green, white) with letters. A green vertical bar is on the left. The bottom row has numbers 1 to 24.

[illegible]

Figure 1: A 24x5 grid representing a 24-hour period across five days. The grid is divided into four 6-hour segments (1-6, 7-12, 13-18, 19-24). A red dashed line at the top indicates a 24-hour cycle. The grid shows various colored circles (green, orange, black, white) and letters (A, C, D, E) representing different activities or states. A green vertical bar on the left indicates a 24-hour period.

Figure 1: A 24x4 grid representing a 24-hour day and 4 lanes. The grid contains colored circles (green, orange, black, white) representing different data points. A red dashed line is at the top, and a green dashed line is at the bottom. The grid is divided into four 6x4 quadrants by a vertical line at column 12.
